ADI - KB Specialty Foods Greensburg, IN

avus 600 kW Biogas

Fast Facts:

Location: Greensburg, IN

Generating Capacity: 600 kW

Gas Type: Biogas

About the Site:

The 2G avus 600 kW CHP is located at Kroger company's K.B. Specialty Foods. Recently, Kroger announced a Zero Hunger | Zero Waste social impact plan that this project supports. The goal is to end hunger in communities Kroger serves and eliminate waste in their company by 2025.

Statistics

Zero Waste Facility since 2014. In that time, they have diverted more than 90% of waste produced from going to landfill each year.

Application

This new system replaced a conventional wastewater treatment system and features a dome that captures biogas and the combined heat and power system that takes food by-products and works together to convert them into energy.
