

The Matt Brewing Company Utica, NY

agenitor 212
Biogas

Fast Facts:

Location: Utica, NY

Generating Capacity: 400 kW

Configuration: Inside Building
Installation

Extras: Biogas Treatment System

About the Site:

F.X. Matt Brewing Company is a family-owned brewery in Utica, New York. It is the fourth oldest family-owned brewery in the United States, having brewed beer since 1888. Its most popular product is the Saranac line of beers; soft drinks such as root beer and ginger beer are also sold. Their philosophy has always been to brew beers that are both distinctive and drinkable. Their attention to detail and uncompromising commitment to quality represent the signature trademark of their four generation family business.

Application

The brewing process creates wastewater from cleaning out brewing vessels and aging vats daily. The wastewater is saturated with organic materials, which are broken down by bacteria in the digestion process. The system treats an average of 150,000 gallons of water each day, or 50 million gallons per year, generating up to 400 kW/h of electricity and 474 kW thermal energy used by the brewery.
